

The Through-Line: Map Content & CTAs

Name: Muhammad Ali

Track: General AI Fluency

Week: 3

One-Line Claim

“I build practical AI and software systems that turn real problems into usable solutions.”

Content Map

1. Home

Sections in order:

1. Hero: One-line claim and short introduction
2. Selected Work: Strongest projects and case studies
3. What I Build: AI, machine learning, automation, and software development
4. About: Short introduction and background
5. Contact: Simple invitation to connect

Featured case: FlyRank ML Internship: **Refresh / Content Opportunity Scoring**

Call to action: Explore My Work

2. Work

Sections in order:

1. Featured Projects
2. FlyRank ML Internship
3. SyncWorks : AI Automation and Software
4. Other Selected Projects
5. Project Categories

Featured case: FlyRank ML Internship and SyncWorks

Call to action: View a Case Study

3. FlyRank Case Study

Sections in order:

1. Project Overview
2. The Problem
3. Data and Signals
4. Decisions I Made
5. Research and Exploration
6. ML Task Framing
7. Current Progress
8. What's Next
9. Project Evidence

Featured case: Refresh / Content Opportunity Scoring

Call to action: View the Project on GitHub

4. SyncWorks / Projects

Sections in order:

1. SyncWorks Overview
2. AI Automation
3. AI Agents
4. n8n Workflows
5. Custom Software
6. Selected Project Screenshots
7. Project Details

Featured case: SyncWorks projects and software work

Call to action: Explore Projects

5. About

Sections in order:

1. Introduction
2. Background
3. What I Work On
4. Current Learning and Projects
5. Skills and Tools
6. Personal Profile

Featured case: No single case study; this page supports the projects shown throughout the portfolio.

Call to action: View My Work

6. Contact

Sections in order:

1. Short introduction
2. What I Can Help With
3. Contact Information
4. Social and Professional Links

Featured case: None

Call to action: Get in Touch

Still Need to Gather

- Final screenshots from the FlyRank research question notebook
- Final screenshots from the ML task framing notebook
- GitHub repository link and selected repository screenshots
- Baseline scoring results once the next ML assignments are completed
- Final ranking and evaluation results from the content refresh project
- Screenshots and demonstrations of completed SyncWorks projects
- Live demo links where available
- Final portfolio profile photograph
- Final SyncWorks logo and favicon assets
- Final project descriptions and case study screenshots
- Any future project results that are not available yet
- Testimonials or client feedback if available

CTA Direction

The main action throughout the portfolio is to encourage visitors to explore the actual work and then get in touch if they want to discuss a project.

The pages therefore lead visitors from the main claim to selected work, from selected work to detailed case studies, and from the case studies toward the project repository or contact page.
